Lazar Kelić

Front-end React Developer

As a Front-end developer, I have been involved in Web Development for the past 2 years. While I haven't had the opportunity to work on a team before, I am eager to learn and collaborate with others. I have solid grasp of React and its libraries, and I am comfortable using them to develop complex and dynamic user interfaces while also learning and improving in these areas. I am looking forward to the opportunity to work with a team of experienced developers and make valuable contribution to your company's success.
